Downstream · all ten field pairs
Native-cell/time pooled; chronological validation · full mode range; no weak-mode cutoff
Density × Electron temperature
Density × Ion temperature
Density × Potential
Density × Parallel ion velocity
Electron temperature × Ion temperature
Electron temperature × Potential
Electron temperature × Parallel ion velocity
Ion temperature × Potential
Ion temperature × Parallel ion velocity
Potential × Parallel ion velocity
Cross amplitude / peak truth amplitude
Toroidal mode n = 5k
Truth
Downstream from balanced loss, boundaries included
Downstream from clean compressor + learned mean/fluctuation weights + clean replay
