Electron temperature · full-volume fluctuation power · start 535
Lead 1 · +3.13 µs
Lead 4 · +12.53 µs
Lead 8 · +25.06 µs
Lead 16 · +50.11 µs
Variance contribution (eV)²
Toroidal mode number n = 5k
Truth
Deterministic forecast
Full-target diffusion
Residual diffusion
Native-volume weighted; positive/negative Fourier pairs combined. Power does not measure phase alignment.
