
Ion target heat · start 535 → frame 543
Lead 8 · +25.06 µs
Truth
Deterministic forecast
Full-target diffusion
Residual diffusion
Target arclength (mm)
Native toroidal coordinate (°)
Ion heat (MW m^{-2})
Toroidally averaged heat (MW m^{-2})
Target arclength (mm)
Truth
Deterministic forecast
Full-target diffusion
Residual diffusion
Recovered outer-target sheath heat; not measured tile loading. Ion closure imposes Bohm speed.
Gray = invalid. Fixed scales across models/time. Five saved leads shown; no temporal interpolation.
